Security-Net™ partners at 2016 annual meeting.

PARTNER PROFILE: A.C. TECHNICAL SYSTEMS

A.C. Technical Systems has built an unparalleled reputation in the enterprise security space over the past 25 years, based on the simple philosophy of placing "customers first." This dedication to the highest standards of service and quality is made possible through their uniquely talented and deeply committed team of security professionals.

From its home base in Whitby, Ontario, A.C. Technical Systems serves a wide-ranging customer base that spans healthcare, education and government clients as well as more specialized areas such as mining and courthouse protection.

Keeping up with the latest technology has taken A.C. Technical Systems beyond the core disciplines of access control, IP video and CCTV and into infant abduction, wandering patient, thermal imaging and active shooter products and programs. Among its newest offerings for clients are system health monitoring and managed services.

With a well-established background in network integration, A.C. Technical serves customers throughout Canada, offering expertise in systems that optimize open IT network standards.

As a full-service integrator, A.C. Technical Systems performs audits and site assessments, business analysis, planning and system development, project management and turnkey installation. Customized training and preventative maintenance and service are also part of the overall solution.

Safety for both employees and clients is at the heart of the company's mission when undertaking any project. It has an aggressive safety program in place to secure both workers and subcontractors, as well as to ensure the safety of customers and the public. Each project has its own safety program in place, which A.C. Technical Systems modifies in partnership with its customer. The company is ISO 9001-2008 certified.

"Our dedication to a higher standard of quality craftsmanship combined with the most advanced IP technology capabilities and a customized security solutions approach make us truly unique in our industry," said Dominic Burns, president of A.C. Technical System. "Our core purpose is to be the absolute best at what we do. We simply will not compromise on quality, ever."
