## PARTNER PROFILE: PASEK CORPORATION

Like its New England surroundings, Pasek Corp. is steeped in history. In business for more than 140 years, Pasek has evolved from a small, mechanical locking system provider to becoming one of the region's largest security systems integrators.

With offices in Boston, South Boston, Providence, Rhode Island and Londonderry, New Hampshire, Pasek still services and installs keys and cores, but also provides card access and alarm systems, video and visitor management capabilities and one of its latest product categories, biometric facial recognition. The latter is used in conjunction with optical turnstiles in high-volume entry locations in various vertical security markets such as investment firms, manufacturing plants, technology labs and pharmaceutical companies.

Another key area for Pasek is the installation of baby/mother and child protection systems in maternity and pediatric units for hospitals, as well as similar tracking systems for the elderly in geriatric units. Pasek considers itself a leader in designing custom systems for each facility, focusing on delivering the proper devices to alert staff, patients and visitors of unauthorized entry or activity. It also works to interface these systems with access control, CCTV and various alarm systems.

Aspiring to be a full-service product and service company that can design, implement and install entire systems, Pasek has achieved factory representative and factory trained dealer status for numerous manufacturers as well as being a registered locksmith.

Clients range from hospitals and healthcare organizations to colleges and universities, pharmaceutical companies and utilities. Work often begins with a security audit to identify critical needs, followed by a multi-year security initiative. Pasek staffers are capable of handling systems of all sizes, from single-door systems through projects involving multiple buildings here and abroad.

"Over our long history, Pasek has installed hundreds of systems, both large and small," said David Alessandrini, vice president. "Every day we look for new ways to expand and hone our range of services so we can meet the needs of our clients whether they are in Boston, New England or have offices halfway around the world."
